Goods & Services

Tips for Schools:

- Clearly articulate the purpose and process of the needed goods and services

- Provide the church with documentation on how monetary gifts have been spent

- Send the church photos of the outcomes of their donations so that they can share the impact with the congregation

Tips for Churches:

- Create a budget for the year.

- Develop relationships by serving alongside students and families whenever possible. The goal is not to provide more goods and services each year but to work together for the flourishing of the community.
